

As a user for XM radio and a Truck Driver the weather and traffic reports from XM are very helpful and is a positive part of XM. While driving in an area the normal radio am/fm does not offer traffic reports in a time frame that can be helpful. Millions of people including Myself pay a monthly fee by choice for the services of XM Radio. If commercial radio stations are losing listeners maybe they should work on their programming. Governing the programming of XM radio should not fall under attack by the FCC at spurring of NAB. People choose XM by choice and it is not broadcasted to the open airways.
